Experience
InterDev
July 2018 -
current

Senior Developer
Created numerous tools internally within the company's intranet and for existing clients. Web server configurations, SharePoint administration, reporting services.
- Implemented a dashboard with .NET and D3 within ConnectWise, tapping into the backend database. The dashboard illustrates upcoming projects and individual employees work schedules to better plan upcoming work
- Created an online configurator for a counter manufacturing company servicing national big box retailers
- Created numerous reports using SQL and SQL Reporting Services by accessing the data within ConnectWise to illustrate efficiencies and average completion rates for service tickets and hours logged per clients
- Internal brochure work and website maintenance

T–Mobile
July 2005 -
June 2018

Sr Web Developer, Sr eLearning Developer and eLearning Developer
Work independently and with cross functional teams to discover issues, solve problems and implement solutions with creative interactions within the enterprise intranet.
- Work collaboratively as a team for sharing best practices
- Create custom dashboards powered by .NET and JSON for multiple business across the enterprise with consideration for responsive design
- Implement intake forms for work requests to HR Communications team utilizing .NET, JavaScript, RESTful Web Services, SQL and D3. Forms gathered task details, delivered communications during various stages of work to team members, tracked projected level of effort to complete tasks and displayed team capacity levels in easy to read graphs
- Prototype and develop .NET application supported by SQL database that contributed to saving T-Mobile nearly $8.5 million in unrecorded PTO

Kurt R. Cooney
Senior Developer

T–Mobile
July 2005 -
June 2018

- Create custom application with RESTful Web Services to illustrate current and former employees various career paths within T-Mobile. D3 technology illustrates the career paths in charts and Sankey diagrams
- Deploy enterprise wide .NET application supported by SQL database to communicate the details, value and acceptance of the Founders Grant for every individual in the company after the AT&T merger failed
- Maintain 30+ site collections in SharePoint including manage permissions, create custom forms and workflows, and design landing pages with dynamic content
- Test and debug issues across the internal network

Knowlagent Inc.
Alpharetta,
Georgia
August 2000 - July
2005
